**RE: AHERA 3-Year Reinspection
Lowell High School
50 Father Morissette Boulevard and 40 Paige Street
Lowell, Massachusetts
EFI Project No. 014.07795**

Dear Mr. Underwood:

EFI Global Inc. (EFI) is pleased to present this AHERA 3-Year Reinspection Report prepared for the Lowell High School, located at 50 Father Morissette Boulevard and 40 Paige Street in Lowell, Massachusetts (Site). The reinspection site visits were conducted on April 16th, 17th and May 8th, 2024. The corresponding report was completed in accordance with the United States Environmental Protection Agency (USEPA) Asbestos Hazard Emergency Response Act (AHERA) regulations (40 CFR 763) and Massachusetts Department of Labor Standards "Requirements for Schools Subject to AHERA" regulations (454 CMR 28.13).

EFI relied upon previous 3-Year Inspection and Management Plan Update report from 2014 prepared by Cardo ATC, and 2017 and 2020 reinspection's prepared by EFI Global Inc. The original AHERA Management Plan and other subsequent records were not made available at the school or at the administrative office for review. EFI relied upon the 2020 table of identified ACM for this reinspection. The school's Management Plan and records should be located and kept on file at the school and the administrative offices.

EFI is pleased to provide environmental consulting services to Lowell Public Schools. This report should be kept on file with the school's AHERA records. If you have any questions regarding the contents of this report, or are in need of additional information, please contact either of the undersigned at (800) 659-1202. Thank you for the opportunity to serve your environmental needs.

Sincerely,
EFI Global, Inc.

Derrick Calvario
Project Manager
MA Asbestos Inspector # AI 900703

Michael McCarter
Senior Project Manager
MA Asbestos Management Planner #AP 035661

AHERA 3-YEAR REINSPECTION

Attachment C – 2024 Reinspection Asbestos Bulk Sample Laboratory Reports

Attachment D – Licenses and Training Certificates of Asbestos Inspector and Management Planner

INTRODUCTION

EFI Global, Inc. (EFI) was retained by Lowell Public Schools to perform a 3-Year AHERA Reinspection in accordance with United States Environmental Protection (USEPA) Asbestos Hazard Emergency Response Act (AHERA) asbestos regulations (40 CFR 763) and Massachusetts Department of Labor Standards “Requirements for Schools Subject to AHERA” regulations (454 CMR 28.13). These regulations, commonly known as the “Asbestos in Schools Rule,” require under 40 CFR 763.80 and 454 CMR 28.13(2)(b)(1) that local education agencies (LEAs) must conduct a reinspection at least once every three years of all friable and nonfriable known or assumed asbestos-containing materials (ACMs). The reinspection includes all previously known and assumed ACMs, as well as any additional suspect ACM not previously included, as required by 40 CFR 763.80 and 454 CMR 28.13 in each school building leased, owned, or otherwise used as a school building. A school building is defined in 454 CMR 28.02 as including each of the following:

- Any structure suitable for use as a classroom, including a school facility such as a library, school eating facility, or facility used in the preparation of food
- Any gymnasium or other facility which is specially designed for athletic or recreational activities for an academic course in physical education
- Any other facility used for the instruction or housing of students or for the administration of educational or research programs
- Any maintenance, storage, or utility facility, including any hallway, essential to the operation of any facility described as a school building above
- Any portico or covered exterior hallway or walkway
- Any exterior portion of a mechanical system used to condition interior space.

EFI conducted a 3-year AHERA re-inspection at the Lowell High School, which involved determining the condition and hazard potential of previously known and assumed ACMs, and additional confirmed and assumed ACMs observed during the 2024 reinspection. The 3-year re-inspection was conducted on April 16th, 17th, and May 8th, 2024, by Derrick Calvario and Emma Cypherd, both EPA accredited, and Massachusetts Department of Labor Standards (MADLS) licensed Asbestos Inspectors, (license number AI-900703) and (license number AI-901189) respectively. EFI relied upon the 2020 3-year reinspection table of identified and assumed ACMs for this reinspection. The original AHERA Management Plan and subsequent records were not made available at the school for review. The recommended response actions were prepared by MADLS-licensed Asbestos Management Planner Michael McCarter (AP-033118).

EFI notes that the Lowell High School consists of three buildings referenced as the Freshman Academy Building, Sullivan/Kouloheras (Wing) Building and Raymond J. Lord Academic (Wing) Building. EFI observed that two additions were being constructed to the Lowell High Schools at the time of this inspection. EFI recommends that Lowell Schools include the additions in the Lowell High School AHERA program prior to occupancy as a school.

A summary of known and assumed ACM within the Lowell High School is presented in the AHERA Summary Table in **Attachment A**. Site Plans showing buildings and locations referenced in this report are presented in **Attachment B**.

The Designated Person for the Lowell Public Schools is Rick Underwood. Rick’s contact information is:

AHERA 3-YEAR REINSPECTION

A. AHERA Records Review

As part of this 3-year reinspection, EFI reviewed available AHERA records for the school, in accordance with the AHERA regulation and 454 CMR 28.13(5)(f). A summary of records reviewed is provided in the table below.

Review of AHERA Documentation Lowell High School 50 Father Morissette Boulevard and 40 Paige Street, Lowell, Massachusetts		
Document/Record	Present?	Comment
Asbestos Management Plan (on hand at school and available for review)	No	No records available at the school or administrative office for review. The Cardo ATC 2014 3-Year Reinspection and Updated Management Plan is posted on the school’s web site. EFI also relied upon in-house records from the 2017 and 2020 reinspection’s.
Designated Person Training Records (for Rick Underwood)	No	No records available at the school or administrative office for review. Designated Person should receive formal designated person training or review the Designated Person Self Study Guide (available at https://www.epa.gov/sites/default/files/2015-01/documents/dp_study_guide_0.pdf).
Custodial Personnel 2-hour Awareness Training Records	No	No records available at the school or administrative office for review.
Annual Parental Notification Records	No	No records available at the school or administrative office for review. Annual notification letters should be sent or posted on the school’s web site and copies kept on file with the AHERA records.
Abatement/Response Action Records (includes abatement, special cleaning activities & small scale short duration (SSSD) activities and associated monitoring reports and work plans)	No	No records available at the school or administrative office for review.

Designated Person True and Correct Statement	No	No records available at the school or administrative office for review.
6-month Surveillance Inspection Records	No	No records available at the school or administrative office for review.
Previous 3-Year Reinspection Records	No	No records available at the school or administrative office for review.
Asbestos Labels present (required in routine maintenance areas)	No	No labeling observed. Labels should be placed immediately adjacent to ACM present in routine maintenance areas (i.e., boiler rooms, utility closets, etc.)

B. ACM Application Types

ACMs are divided into the following application types:

Thermal system insulation (TSI): Insulation applied to mechanical, heating, and cooling systems such as pipes, boilers, flue breechings, ducts, tanks, and fittings.

Surfacing Materials: Material that is spray-applied or trowel-applied to walls, ceilings, or structural components (i.e., plasters, acoustical finishes, and fireproofing).

Miscellaneous Materials: All other asbestos materials, including but not limited to floor tiles and mastic, ceiling tiles, vinyl cove base and mastic, gypsum board and joint compound, and asbestos-cement board, etc.

C. ACM Assessment Criteria

The assessment is divided into two categories - the physical assessment and the hazard potential assessment.

Physical Assessment

The physical assessment is divided into the following seven categories and describes the material condition at the time of the inspection:

- Physical Condition #1 - Damaged or significantly damaged thermal system ACM.
- Physical Condition #2 - Damaged friable surfacing ACM.
- Physical Condition #3 - Significantly damaged friable surfacing ACM.
- Physical Condition #4 - Damaged or significantly damaged miscellaneous ACM.
- Physical Condition #5 - ACM with potential for damage.
- Physical Condition #6 - ACM with potential for significant damage.
- Physical Condition #7 - Any remaining friable ACM or friable suspected ACM.

Hazard Assessment

The hazard assessment is a combination of the physical assessment combined with the potential for disturbance (i.e., physical contact, vibration air movement) as follows:

- Hazard Rank #1 – Good condition/Low potential for disturbance
- Hazard Rank #2 – Good condition/ Moderate potential for disturbance
- Hazard Rank #3 – Good condition/ High potential for disturbance
- Hazard Rank #4 – Damaged condition/Low potential for disturbance
- Hazard Rank #5 – Damaged condition/Moderate potential for disturbance
- Hazard Rank #6 – Damaged condition/High potential for disturbance
- Hazard Rank #7 – Significantly damaged condition

The following is the Assessment Criteria used during the inspection:

1. Homogeneous Areas (An area of surfacing material, thermal system insulation material, or miscellaneous material that is uniform in size, color and texture and was applied at approximately the same time) were quantified by location and assessed by condition. Materials are listed as friable or non-friable. Note: friable materials are materials that can be crushed and pulverized to dust by hand pressure. A general condition description for suspect materials used in this inspection is as follows:
 - a. Damaged Surfacing ACM: That material which has deterioration, delamination, water damage, lacks cohesion, is blistered, crumbling, gouged, marred heavily, abraded, or in any way has lost its structural integrity over more than 1% but less than 10 % of the total surface area if the damage is evenly distributed or less than 25%, if the damage is localized in one area of the homogeneous area.
 - b. Significantly Damaged ACM: That material which has deterioration, delamination, water damage, lacks cohesion, is blistered, crumbling, gouged, marred heavily, abraded, or in any way has lost its structural integrity over at least 10% of the surface area if the damage is evenly distributed or at least 25% if the damaged is localized.
 - c. Good Condition ACM: ACM with no visible damage or deterioration in less than one percent of the material and/or coverings.
 - d. ACM with potential for damage: Pertains to circumstances in which:
 - i. Friable ACM is in an area regularly used by building occupants, including maintenance workers, currently in intact (good) condition.
 - ii. There are indications that there is a reasonable likelihood that the material or its covering will become damaged, deteriorated or delaminated due to factors such as changes in building use, changes in O&M practices, changes in occupancy or recurrent damage.

Note: All ACM in good condition is still considered to have a potential for damage, and in certain instances, has the potential for significant damage.

- e. ACM with potential for significant damage: Pertains to circumstances in which:
 - i. Friable ACM is in an area regularly used by building occupants, including maintenance personnel.

- ii. Indications show that there is a reasonable likelihood that the material or its covering will become damaged, deteriorated, or delaminated due to factors such as changes in building use, changes in O&M practices, changes in occupancy or re-occurring damage.
- iii. The material is subject to major or continuing disturbance, due to factors including, but not limited to, accessibility or under certain circumstances, vibration or air erosion.

D. Response Actions – General Recommendations

Specific response actions for each known and assumed ACM located at the Lowell High School are located in **Attachment A**. The following are general recommendations for response actions associated with managing ACMs at the school.

1. Damaged materials in the school should be repaired, if feasible, or removed in order to maintain compliance with the AHERA regulations. Damaged ACMs of any quantity listed in the report should be repaired or removed by a Massachusetts licensed asbestos abatement contractor following all applicable regulations, in accordance with a work plan design, and final clearance air testing performed in accordance with the AHERA regulations. It is the policy of the Lowell Public Schools to use licensed asbestos contractors for all response action work.
2. The AHERA regulation states that the response actions chosen for other than small scale/short duration repairs (less than 3 square or linear feet), must be designed and conducted by persons accredited to design and conduct response actions. MADLS Regulation 454 CMR 28.00 requires the services of licensed Project Designers who meet the requirements set forth in 454 CMR 28.00, as well as Massachusetts licensed Asbestos Contractors.
3. Damaged ACMs that involve small scale/short duration repairs can only be conducted by 16-hour asbestos-trained personnel or by a licensed Asbestos Contractor. EFI understands that small scale/ short duration projects will not be performed by in house personnel, and that all work will be conducted by an outside licensed Asbestos Contractor.
4. Each known and assumed ACM should be monitored for any changes in condition during the six-month periodic surveillance, or more frequently.
5. If known or suspect ACMs are to be impacted by planned renovation or demolition activities, the ACM must be removed by a Massachusetts licensed Asbestos Contractor. Note that AHERA inspections do not meet the EPA NESHAP and Commonwealth of Massachusetts Department of Environmental Protection (MADEP) requirements for a comprehensive pre-renovation or demolition survey. Prior to any planned renovation or demolition project, all renovation/demolition areas must be thoroughly surveyed to meet the requirements of EPA NESHAP and MADEP 310 CMR 7.15(4) Survey Requirements. LEA Designated Persons should make sure that pre-renovation/demolition surveys are performed in each instance that ACM may be disturbed.

E. AHERA Licensing & Training Documentation

The AHERA 3-year Reinspection report for the Lowell High School was performed by the following individuals who have received appropriate training and who are MADLS licensed personnel:

Derrick Calvario
 Project Manager
 MA Asbestos Inspector # AI 900703

Michael McCarter
 Senior Project Manager
 MA Asbestos Management Planner #AP 035661

F. Asbestos Bulk Sampling

Asbestos bulk sampling of suspect ACM was performed for various suspect ACMs not previously identified as ACM in portions of the building included in the AHERA program. The bulk sampling was performed by USEPA-accredited, and MADLS licensed Asbestos Inspector Derrick Calvario and Emma Cypherd. A total of 294 bulk samples of suspect ACMs were collected and transported under chain of custody protocol to EMSL Analytical, Inc., of Woburn, Massachusetts, a Massachusetts-licensed laboratory. EMSL is accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) for bulk asbestos fiber analysis, which is administered by the National Institute of Standards and Testing (NIST).

Samples were analyzed with a standard 3-day turnaround time using polarized light microscopy (PLM) in accordance with United States Environmental Protection Agency (USEPA) Method 600/R-93/116. The PLM/DS analytical method is modeled after 40 CFR Part 763, Subpart F, Attachment A: "Interim Method for the Determination of Asbestos in Bulk Insulation Samples." MADEP asbestos regulations define an ACM as any material containing greater than or equal to one percent asbestos. The findings of this report are based upon observations of accessible materials and the analysis of representative bulk samples collected. **Attachment B** contains site plans indicating locations of samples collected and analyzed as part of this reinspection. A copy of the asbestos laboratory reports is presented in **Attachment C**.

Bulk samples representing individual homogenous areas of suspect ACM, (materials that are determined to be uniform in color and texture and installed in the same construction period) were collected in a randomly distributed manner, in accordance with the EPA sampling protocol outlined in 40 CFR 763.

The following suspect ACMs sampled by EFI during the 2024 reinspection were reported by EMSL as containing no detectable concentration of asbestos:

Summary of Non-ACMs per 2024 3-Year Reinspection
Freshman Academy Building

Material Description	Location(s) Sampled
Gypsum Board	Hallway Near Room 700, 2 nd /3 rd Floor Rear Staircase
Joint Compound	Hallway Near Cafeteria, Room 717, Hallway Near Room 811, Room 911, Room 819, 2 nd /3 rd Floor Rear Staircase, Hallway Near Room 850

Material Description	Location(s) Sampled
Yellow Corner Bead Mastic	Near Cafeteria
Interior White Window Caulk	Cafeteria, Room 910,
Pin/Fissure Ceiling Tile	Room 702, Hallway Outside 911
Cove Base	Room 703, Room 908
Tan Mastic Associated with Cove Base	Room 703, Room 908
Black Stair Tread Mastic	Hallway Outside Theater
Interior Black Caulking	John Street Side Door/ Lobby
Yellow Stair Tread Mastic	John Street Side Door/ Lobby
White Sink Undercoat	Room 724, Room 909
12x12 Tan Floor Tile with Tan Speck	Room 811, Room 850
12x12 Beige Floor Tile with Tan Speck	Room 901, 3 rd Floor Hallway Center
12x12 Light Grey Floor Tile with Grey Speck	Room 906, Room 904
12x12 Red Floor Tile with White Speckle	Room 856
12x12 White Floor Tile	Room 855
12x12 Tan Floor Tile	Room 854, Room 810
12x12 White Floor Tile with Blue Orange Speck	Cafeteria, Hallway Near 712
Yellow Tile Mastic	Room 856, Room 855, Room 854, Room 810, Cafeteria, Hallway Near 712, Room 906, Room 904
Black Tile Mastic	Room 855, Room 901, Hallway Near 712, Room 856
White Floor Leveler	Room 855, Room 854, Hallway Near 712, Hallways Near 854
Crow's Feet Ceiling Tile	Room 902, Room 851
Lab Bench	Room 901
Ceramic Tile Grout	2 nd Floor Men's Room, 2 nd Floor Women's Room, Hallway Outside Cafeteria
White Caulking on Interior Door Frame	Basement Cafeteria, Outside Theater
Black Caulking on Doors	Rear Door, Door # 4
Black Caulking on Windows	Paige Street Windows, Window by Door # 3
1x1 Ceiling Tile	Hallway Outside Cafeteria

**Summary of Non-ACMs per 2024 3-Year Reinspection
Sullivan/ Kouloheras (Wing) Building**

Material Description	Location(s) Sampled
Cove Base	2 nd Floor Near Staircase D, 3 rd Floor Near Storage
Yellow Cove Base Mastic	2 nd Floor Near Staircase D, 3 rd Floor Near Storage
Green Carpet Mastic	Room 232, Room 207B
Plaster Skim Coat	Room 232, Room 223, Room 308, 304A, Room 105, Under Staircase D, Hallway by Staircase C
Plaster Base Coat	Room 232, Room 223, Room 308, 304A, Room 105, Under Staircase D, Hallway by Staircase C

Material Description	Location(s) Sampled
Yellow Trim/Baseboard Mastic	Outside Room 234
Gypsum Board	Room 208B, Custodian by Room 144
Joint Compound	Room 223, Room 206C, Room 308, Room 109, Hallway by Staircase I, Room 016, Near Room 023 and 027
Yellow Stair Tread Mastic	Staircase B
12x12 Grey Floor Tile	Room 207B
12x12 Dark Blue Floor Tile	Room 314, Hallway by Room 305
12x12 White Floor Tile	Room 314, Hallway by Room 305
12x12 Teal Floor Tile	Room 314, Hallway by Room 305
12x12 Light Blue Floor Tile	Rom 314, Office off Room 304A
12x12 Grey Floor Tile	Room 314
12x12 Dark Grey Floor Tile	Room 314, Room 027
12x12 Grey Floor Tile with Smudge	4 th Floor Office Area
12x12 Beige Floor Tile	Room 012, Room 020
Yellow Tile Mastic	Room 207B, 4 th Floor Office Area, Room 020
Yellow Carpet Mastic	Room 207B, Room 120
Floor Leveler	Room 207B, Room 304A, Basement Storage/Old Bathroom
Grey Luxury Vinyl Plank	2 nd Floor Staircase B Landing
Ceramic Tile Grout	Near Room 220, Bathroom by Room 147, Room 304A, Basement Storage/Old Bathroom
Ceramic Tile Thinset	Near Room 220, Bathroom by Room 147
Pinhole Ceiling Tile	Room 306, Room 316
Large Crow's Feet Ceiling Tile	Room 005, Room 023
Small Crow's Feet Ceiling Tile	Room 026, Room 025
Textured Pinhole Ceiling Tile	Hallway by Room 014, Room 020
Rough Textured Ceiling Tile	Room 026
Black Floor Tile Mastic	Room 305
White Caulking on Wall	Room 147, Basement Storage/Old Bathroom
Grey Sink Undercoat	Room 017
Grey with Speck Vinyl Flooring	Room 017, Room 019
Exterior Grey Door Caulk	1 st Floor Across from Stair I, 1 st Floor Across from Stair B
Exterior Black Window Caulking	Courtyard
White Joint Caulk	Front of Building

Summary of Non-ACMs per 2024 3-Year Reinspection
Raymond J. Lord Academic (Wing) Building

Material Description	Location(s) Sampled
12x12 White Floor Tile	Room 648, Entrance by Cafeteria
12x12 Red Floor Tile	Room 667, 1 st Floor Slip Sink
12x12 Grey Floor Tile	Outside Room 558, 1 st Floor Slop Sink, Cafeteria

Material Description	Location(s) Sampled
12x12 White with Blue Speckle Floor Tile	Cafeteria
12x12 Dark Blue Floor Tile	Cafeteria
12x12 Light Blue Floor Tile	Cafeteria
12x12 Maroon Floor Tile	Kitchen
12x12 Pink Floor Tile	Kitchen
12x12 Grey with Speckled Floor Tile	Kitchen
12x12 Grey with Smudge Floor Tile	Kitchen
12x12 Beige with Speckled Floor Tile	1 st Floor Nurse' Room
12x12 Magenta Floor Tile	Kitchen
Black Tile Mastic	Kitchen, 1 st Floor Nurse' Room
Yellow Tile Mastic	Outside Room 158, Side Entrance by Cafeteria, Kitchen
Floor Leveler	Outside Room 648
Cove Base	Outside Room 558, Outside Room 658
Tan Cove Base Mastic	Outside Room 558, Outside Room 658
Crow's Feet Ceiling Tile	Hallway Outside 648, Room 646
Pinhole Ceiling Tile	Outside Room 629, 1 st Floor Kitchen
Small Crow's Feet Ceiling Tile	Room Outside School Store, Room 652
Brown Window Caulking	Cafeteria, Room 652
Brown Wall Caulking	Outside Room 648
White Wall Caulking	Cafeteria, Room 652
Spray-On Fire Proofing	Outside Room 629, Outside Room 652, 2 nd Floor Outside Staircase 5, 1 st Floor Outside Staircase 5
Lab Bench	3 rd Floor Lab B
Grey Vinyl Sheet Flooring	Outside Hallway School Store
Blue Sheet Floor Mastic	Outside Hallway School Store
Gypsum Board	Hallway Near 527, Hallway Behind Kitchen
Joint Compound	Hallway Near 527, Hallway Behind Kitchen, 1 st Floor Hallway Outside Nurse' Room, 1 st Floor Outside Staircase 5, Room 644, Room 654, Room 624
Red Fire Stopper	2 nd Floor Outside Stair 5
Ceramic Tile Grout	Kitchen, 2 nd Floor Women's Bathroom by Staircase 5, 3 rd Floor Women's Bathroom by Staircase 5
White Window Caulk Under Silicone	Cafeteria
Grey Vinyl Sheet Flooring	3 rd Floor Stair 5 Landing, 1 st Floor Staircase 5 Landing
Yellow Mastic on vinyl Sheet Flooring	3 rd Floor Stair 5 Landing, 1 st Floor Staircase 5 Landing, Bridge Near Room 548
Brown Caulk on Bridge	Bridge Near Room 548
Sheet Flooring on Bridge	Bridge Near Room 548
Exterior Black Door Caulk	Exterior Door #4
Exterior Red Caulk on Brick	Near Exterior Door #4
Exterior White Caulk on Building	Near Exterior Door #4

G. ACM Hazard Assessment & Recommended Response Actions

Accessible locations were inspected and assessed to determine the presence and condition of ACM. A Summary Table of known and assumed ACMs present at the school, the physical and hazard assessments and the recommended response action for each ACM, is presented in **Attachment A**. It should be noted that EFI did not conduct destructive evaluations of the school building to identify suspect ACM. Per USEPA NESHAP and MADEP asbestos regulations, a thorough “path of construction” survey should be conducted prior to any renovation or repair activities that may impact suspect ACM, regardless of the date of installation.

H. Cost Estimate and Schedule for Recommended Response Actions

The confirmed and assumed ACMs outlined in the summary table in **Attachment A** that were in good condition at the time of the reinspection must be maintained in place in accordance with the Operations and Maintenance Plan. Estimated costs associated with managing known and assumed ACMs at the school are summarized below.

Cost Estimate of AHERA Considerations Lowell High School 50 Father Morissette Boulevard and 40 Paige Street, Lowell, Massachusetts	
Training Costs	
Item	Approximate Cost
2-hour asbestos awareness training (New Hires, within 60 days of hire)	\$500/person
Designated Person Training	\$250
Maintenance Costs	
Item	Approximate Cost
Asbestos labeling (Place/maintain labels adjacent to ACM in routine maintenance areas)	\$500
6-month surveillance inspections (Per schedule below)	\$500/event
3-year re-inspection (Per schedule below)	\$2,000
Response Action Costs	
Item	Approximate Cost
No Recommended Response Actions.	Not Applicable

A proposed schedule of events between this 3-Year reinspection and the 2027 3-Year reinspection is provided for your use:

Schedule of AHERA-Related Actions Lowell High School 50 Father Morissette Boulevard and 40 Paige Street, Lowell, Massachusetts	
Event	Completion Date
Annual Parental Notification Letter	September 1, 2024
6 Month Surveillance Inspection	November 8, 2024
6 Month Surveillance Inspection	May 8, 2025
Annual Parental Notification Letter	September 1, 2025
6 Month Surveillance Inspection	November 8, 2025
6 Month Surveillance Inspection	May 8, 2026
Annual Parental Notification Letter	September 1, 2026
6 Month Surveillance Inspection	November 8, 2026
3 Year Reinspection	May 8, 2027

ATTACHMENT A

AHERA SUMMARY TABLE

AHERA 3-Year Reinspection Summary Table
 Lowell High School
 Summary Table of Identified and Assumed Asbestos-Containing Building Materials
 50 Father Morissette Boulevard and 40 Paige Street, Lowell, MA
 Dates of Inspection: April 16th, 17th and May 8, 2024

Item	Material Description	Location	Quantity	Friability (F/NF)	Sample Results	Assessment Category	Condition	Response Actions/Notes	Recommended Completion Date
1	Pipe Insulation	Sullivan/Kouloheras Building - Fan Room – Canal Street Side	50 LF	NF	Positive per Management Plan records	6	Good	Manage in place in accordance with the Asbestos O&M Program. Rooms where vibration is present due to operating mechanical equipment can be inspected more frequently, such as every 3 months, by trained maintenance personnel. Do not store ladders, supplies or other equipment near the pipe fitting insulation.	
2	Flex Joint	Sullivan/Kouloheras Building – Room Beneath Pool (Mechanical)	10 Joints	NF	Positive per Management Plan records	6	Good	Manage in place in accordance with the Asbestos O&M Program. Rooms where vibration is present due to operating mechanical equipment can be inspected more frequently, such as every 3 months, by trained maintenance personnel. Do not store ladders, supplies or other equipment near the pipe fitting insulation.	
3	Pipe Elbow Insulation	Sullivan/Kouloheras Building – Room Beneath Pool (Mechanical)	5 Elbows	NF	Assumed ACM per Management Plan records	6	Good	Manage in place in accordance with the Asbestos O&M Program. Rooms where vibration is present due to operating mechanical equipment can be inspected more frequently, such as every 3 months, by trained maintenance personnel. Do not store ladders, supplies or other equipment near the pipe fitting insulation. Collect bulk samples to determine asbestos content prior to any disturbance.	
4	Plaster Ceiling	Sullivan/Kouloheras Building Fan Room – Kirk Street Side	850 SF	NF	Positive per Management Plan records	6	Good	Manage in place in accordance with the Asbestos O&M Program. Rooms where vibration is present due to operating fans should be inspected regularly, such as every 2-3 weeks, by trained maintenance personnel.	
5	Plaster Ceiling	Sullivan/Kouloheras Building Fan Room – Canal Street Side	800 SF	NF	Positive per Management Plan records	6	Good	Manage in place in accordance with the Asbestos O&M Program. Rooms where vibration is present due to operating fans should be inspected regularly, such as every 2-3 weeks, by trained maintenance personnel.	
6	Lab Bench (material added per 2024 reinspection)	Sullivan/Kouloheras Building – Room 314	220 SF	NF	40 % Chrysotile Asbestos	5	Good	Manage in place in accordance with the Asbestos O&M Program.	
7	Lab Bench (material added per 2024 reinspection)	Sullivan/Kouloheras Building – Room 304A	200 SF	NF	40 % Chrysotile Asbestos	5	Good	Manage in place in accordance with the Asbestos O&M Program.	
8	Black Window Caulking (material added per 2024 reinspection)	Sullivan/Kouloheras Building – Near Stair B Interior Courtyard	150 LF	NF	3% Chrysotile Asbestos	5	Good	Material was observed to be located on interior side of windows and doors. Manage in place in accordance with the Asbestos O&M Program.	
9	Black Window Caulking (material added per 2024 reinspection)	Sullivan/Kouloheras Building – Near Stair I Interior Courtyard	150 LF	NF	3% Chrysotile Asbestos	5	Good	Material was observed to be located on interior side of windows and doors. Manage in place in accordance with the Asbestos O&M Program.	
10	Exterior Black Window Caulking (material added per 2024 reinspection)	Raymond J. Lord Academic Wing	65 Units	NF	2% Chrysotile Asbestos	5	Good	Material was observed to be located on the exterior side of windows. Manage in place in accordance with the Asbestos O&M Program.	

AHERA 3-Year Reinspection Summary Table
 Lowell High School
 Summary Table of Identified and Assumed Asbestos-Containing Building Materials
 50 Father Morissette Boulevard and 40 Paige Street, Lowell, MA
 Dates of Inspection: April 16th, 17th and May 8, 2024

Item	Material Description	Location	Quantity	Friability (F/NF)	Sample Results	Assessment Category	Condition	Response Actions/Notes	Recommended Completion Date
11	Flex Joint	Freshman Academy – Penthouse Mechanical Room	3 Joints	NF	Positive per Management Plan records	6	Good	Manage in place in accordance with the Asbestos O&M Program. Do not store ladders, supplies or other equipment near the pipe joint insulation.	

SF = Square Feet

LF = Linear Feet

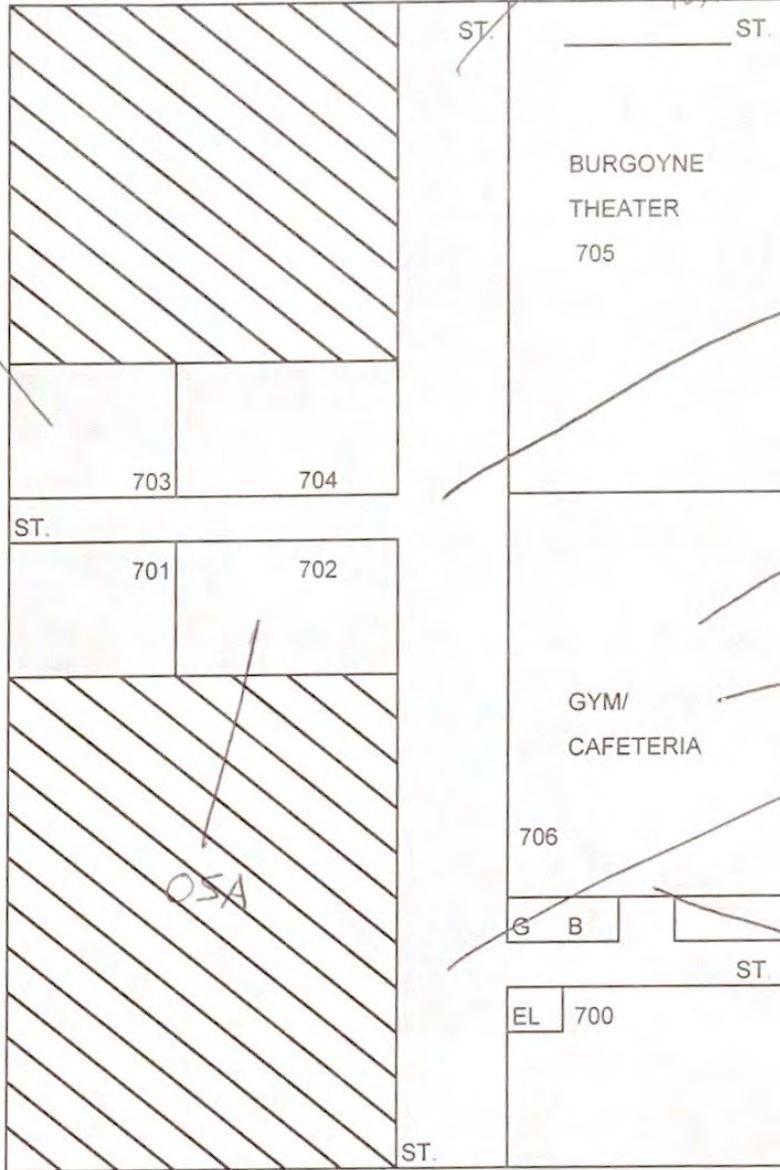

For all recommended response actions, the work should be conducted by a Massachusetts licensed Asbestos Contractor and a work plan for the specific repair or removal activity should be prepared by a Massachusetts licensed Asbestos Designer.

Physical Assessment Category
1 – Damaged or Significantly Damaged Thermal System ACM
2 – Damaged Friable Surfacing ACM
3 – Significantly Damaged Surfacing ACM
4 – Damaged or Significantly Damaged Friable Miscellaneous ACM
5 – ACM with Potential for Damage
6 – ACM with Potential for Significant Damage
7 – Any Remaining friable ACM or friable suspect ACM

Test Report: Asbestos Analysis of Bulk Materials via AHERA Method 40CFR 763 Subpart E Appendix E supplemented with EPA 600/R-93/116 using Polarized Light Microscopy

Sample	Description	Appearance	Non-Asbestos		Asbestos
			% Fibrous	% Non-Fibrous	% Type
38B <small>132402239-0087</small>	Basement - Room 026 - Rough Textured CT	Gray Fibrous Homogeneous	70% Min. Wool	30% Non-fibrous (Other)	None Detected
39A <small>132402239-0088</small>	Basement - Room 017 - Gray Sink Undercoat	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
39B <small>132402239-0089</small>	Basement - Room 017 - Gray Sink Undercoat	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
40A <small>132402239-0090</small>	Basement - Room 017 - Gray w. Spec Vinyl Flooring	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
40B <small>132402239-0091</small>	Basement - Room 019 - Gray w. Spec Vinyl Flooring	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
41A <small>132402239-0092</small>	Basement - Room 020 - Yellow Mastic assoc. w. 12x12 Beige Floor Tile	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
41B <small>132402239-0093</small>	Basement - Room 020 - Yellow Mastic assoc. w. 12x12 Beige Floor Tile	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
42A <small>132402239-0094</small>	Exterior - Across from Stair B - Exterior Gray Door Caulk	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
42B <small>132402239-0095</small>	Exterior - Across from Stair I - Exterior Gray Door Caulk	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
43A <small>132402239-0096</small>	Courtyard - Exterior Black Window Caulk	Gray Non-Fibrous Homogeneous	2% Glass	98% Non-fibrous (Other)	None Detected
43B <small>132402239-0097</small>	Front of Building - Exterior Black Window Caulk	Gray Non-Fibrous Homogeneous	2% Glass	98% Non-fibrous (Other)	None Detected
44A <small>132402239-0098</small>	Front of Building - Exterior White Joint Caulk	White Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
44B <small>132402239-0099</small>	Front of Building - Exterior White Joint Caulk	White Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method") but augmented with procedures outlined in the 1993 ("final") version of the method. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Estimation of uncertainty is available on request.

Samples analyzed by EMSL Analytical, Inc. Woburn, MA NVLAP Lab Code 101147-0, CT PH-0315, MA AA000188, RI AAL-139, VT AL998919, ME LB-0039

Test Report: Asbestos Analysis of Bulk Materials via AHERA Method 40CFR 763 Subpart E Appendix E supplemented with EPA 600/R-93/116 using Polarized Light Microscopy

Sample	Description	Appearance	Non-Asbestos		Asbestos
			% Fibrous	% Non-Fibrous	% Type
30B <small>132402240-0052</small>	3rd Floor - Outside Room 652 - Spray-on Fireproofing - Ceiling	Gray Fibrous Homogeneous	40% Cellulose	60% Non-fibrous (Other)	None Detected
30C <small>132402240-0053</small>	2nd Floor - Outside Stair 5 - Spray-on Fireproofing	Gray Fibrous Homogeneous	40% Cellulose	60% Non-fibrous (Other)	None Detected
30D <small>132402240-0054</small>	2nd Floor - Outside Stair 5 - Spray-on Fireproofing	Gray Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
30E <small>132402240-0055</small>	1st Floor - Outside Stair 5 - Spray-on Fireproofing	Gray Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
30F <small>132402240-0056</small>	1st Floor - Outside Stair 5 - Spray-on Fireproofing	Gray Fibrous Homogeneous	40% Cellulose	60% Non-fibrous (Other)	None Detected
30G <small>132402240-0057</small>	1st Floor - Outside Stair 5 - Spray-on Fireproofing	Gray Fibrous Homogeneous	40% Cellulose	60% Non-fibrous (Other)	None Detected
31A <small>132402240-0058</small>	3rd Floor - Lab B - Lab Bench	Black Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
31B <small>132402240-0059</small>	3rd Floor - Lab B - Lab Bench	Black Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
32A <small>132402240-0060</small>	2nd Floor - Hall Outside School Store - Gray Vinyl Sheet Flooring	Gray/Tan Fibrous Homogeneous	15% Cellulose	85% Non-fibrous (Other)	None Detected
32B <small>132402240-0061</small>	2nd Floor - Hall Outside School Store - Gray Vinyl Sheet Flooring	Gray/Tan Fibrous Homogeneous	15% Cellulose	85% Non-fibrous (Other)	None Detected
33A <small>132402240-0062</small>	2nd Floor - Hall Outside School Store - Blue Mastic assoc. w. Vinyl Sheet Flooring	Green Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
33B <small>132402240-0063</small>	2nd Floor - Hall Outside School Store - Blue Mastic assoc. w. Vinyl Sheet Flooring	Green Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
34A <small>132402240-0064</small>	2nd Floor - Hallway near 527 - Gypsum Board	Brown/Gray Fibrous Homogeneous	15% Cellulose 2% Glass	83% Non-fibrous (Other)	None Detected
34B <small>132402240-0065</small>	1st Floor - Hallway behind Kitchen - Gypsum Board	Brown/Gray Fibrous Homogeneous	15% Cellulose 2% Glass	83% Non-fibrous (Other)	None Detected
35A <small>132402240-0066</small>	2nd Floor - Hallway near 527 - Joint Compound	White Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
35B <small>132402240-0067</small>	1st Floor - Hallway behind Kitchen - Joint Compound	White Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
35C <small>132402240-0068</small>	1st Floor - Hall Outside Nurse - Joint Compound	White Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method") but augmented with procedures outlined in the 1993 ("final") version of the method. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Estimation of uncertainty is available on request.

Samples analyzed by EMSL Analytical, Inc. Woburn, MA NVLAP Lab Code 101147-0, CT PH-0315, MA AA000188, RI AAL-139, VT AL998919, ME LB-0039

**Test Report: Asbestos Analysis of Bulk Materials via AHERA Method 40CFR 763 Subpart E
Appendix E supplemented with EPA 600/R-93/116 using Polarized Light Microscopy**

Sample	Description	Appearance	Non-Asbestos		Asbestos
			% Fibrous	% Non-Fibrous	% Type
06B 132402235-0017	2nd Floor - Room 908 - Cove Base	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
07A 132402235-0018	Basement - Room 703 - Assoc. Tan Mastic	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
07B 132402235-0019	2nd Floor - Room 908 - Assoc. Tan Mastic	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
08A 132402235-0020	Basement - Hallway Outside Theater - Black Stair Tread Mastic	Brown Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
08B 132402235-0021	Basement - Hallway Outside Theater - Black Stair Tread Mastic	Brown Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
09A 132402235-0022	Basement - John St. Door - Interior Black Caulk on Exterior Door	Black Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
09B 132402235-0023	Basement - John St. Door - Interior Black Caulk on Exterior Door	Black Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
10A 132402235-0024	Basement - John St. Lobby - Yellow Tread Mastic	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
10B 132402235-0025	1st/2nd Floor - John St. Lobby - Yellow Tread Mastic	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
11A 132402235-0026	1st Floor - Room 724 - White Sink Undercoat	White Fibrous Homogeneous	10% Cellulose	90% Non-fibrous (Other)	None Detected
11B 132402235-0027	2nd Floor - Room 909 - White Sink Undercoat	White Fibrous Homogeneous	10% Cellulose	90% Non-fibrous (Other)	None Detected
12A 132402235-0028	2nd Floor - Hallway Outside Room 811 - 12x12 Tan w. Tan Spec Floor Tile	Tan Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
12B 132402235-0029	3rd Floor - Room 850 - 12x12 Tan w. Tan Spec Floor Tile	Tan Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
13A 132402235-0030	2nd Floor - Room 901 - 12x12 Beige w. Tan Spec Floor Tile	Beige Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
13B 132402235-0031	3rd Floor - Hallway Center - 12x12 Beige w. Tan Spec Floor Tile	Beige Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
14A 132402235-0032	2nd Floor - Room 901 - Assoc. Black Mastic w. Tan/Beige Tile	Black Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
14B 132402235-0033	3rd Floor - Room 901 - Assoc. Black Mastic w. Tan/Beige Tile	Black Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method") but augmented with procedures outlined in the 1993 ("final") version of the method. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Estimation of uncertainty is available on request.

Samples analyzed by EMSL Analytical, Inc. Woburn, MA NVLAP Lab Code 101147-0, CT PH-0315, MA AA000188, RI AAL-139, VT AL998919, ME LB-0039

Test Report: Asbestos Analysis of Bulk Materials via AHERA Method 40CFR 763 Subpart E Appendix E supplemented with EPA 600/R-93/116 using Polarized Light Microscopy

Sample	Description	Appearance	Non-Asbestos		Asbestos
			% Fibrous	% Non-Fibrous	% Type
01A <small>132402611-0001</small>	Sullivan Building Room 305 (Hall) - Black Mastic	Black Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
01B <small>132402611-0002</small>	Sullivan Building Room 305 (Hall) - Black Mastic	Black Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
02A <small>132402611-0003</small>	Raymond J Lord - Cafeteria - 12x12 Gray Floor Tile	Gray/Blue Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
03A <small>132402611-0004</small>	Raymond J Lord - Cafeteria - Yellow Tile Mastic	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
03B <small>132402611-0005</small>	Raymond J Lord - Cafeteria - Yellow Tile Mastic	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
04A <small>132402611-0006</small>	Room 856 - Freshman Academy - 12x12 Red w. White Speck Floor Tile	Red Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
04B <small>132402611-0007</small>	Room 856 - Freshman Academy - 12x12 Red w. White Speck Floor Tile	Red Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
05A <small>132402611-0008</small>	Room 856 - Freshman Academy - Assoc. Black Mastic	Tan/Black/Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
05B <small>132402611-0009</small>	Room 856 - Freshman Academy - Assoc. Black Mastic	Tan/Black/Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
06A <small>132402611-0010</small>	Freshman Academy Room 855 - 12x12 White Floor Tile	White Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
07A <small>132402611-0011</small>	Freshman Academy Room 855 - Assoc. Yellow Mastic	Gray/Yellow/Clear Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
08A <small>132402611-0012</small>	Freshman Academy Room 855 - Black Mastic under Yellow Mastic	Gray/Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
09A <small>132402611-0013</small>	Freshman Academy Room 855 - Leveler	Gray/Tan/White Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method") but augmented with procedures outlined in the 1993 ("final") version of the method. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Estimation of uncertainty is available on request.

Samples analyzed by EMSL Analytical, Inc. Woburn, MA NVLAP Lab Code 101147-0, CT PH-0315, MA AA000188, RI AAL-139, VT AL998919, ME LB-0039

Member C.O.N.E.S.

WB - NEW

24

This is to certify that

Derrick W. Calvario

39 Valleywood Road, Hopkinton, MA 01748
MA DLS Asbestos Inspector License# AI900703

*has completed requisite training by Video Conference, and has passed an examination for
reaccreditation as:*

Asbestos Inspector Refresher

pursuant to Title II of the Toxic Substance Control Act, 15 U.S.C. 2646

Course Location

Zoom Video Conference

Institute for Environmental Education 16 Upton Drive Wilmington, MA 01887

August 3, 2023

Course Dates

23-4811-106-265405

Certificate Number

August 03, 2023

Examination Date

August 03, 2024

Expiration Date
